SUMMARY

Aerospace and Mechanical Engineering student at New Mexico State University with hands-on CAD, hardware testing, manufacturing, and project leadership experience. Seeking a full-time role in aerospace.

PROFESSIONAL EXPERIENCE

AeroVironment, Inc. (Formerly BlueHalo)

2025 Summer Internship, Albuquerque, NM

- Worked in SolidWorks to create templates, electronic housings, and several other parts
- Worked with a team to conceptualize an improved program-wide file sorting system to improve workflow
- Conceptualized, created, and presented analysis of humidity within the BADGER antenna body to be used to ensure safe practices and to minimize risk of damaging sensitive electronics

UNM Cosmiac

2024 Summer Internship, Albuquerque, NM

- Learned RF broadcasting and receiving fundamentals
- Designed, fabricated, and tested antennas with a team
- Developed a training presentation to be used by incoming employees for the AFRL SSPIDR program

EDUCATION

New Mexico State University

Expected Graduation of December 2027

GPA: 3.6

- Bachelor of Science in Aerospace Engineering
- Bachelor of Science in Mechanical Engineering

EXTRACURRICULARS

NMSU Atomic Aggies

Fall 2026 - Present

- Special Projects Team member, Avionics Team member

NMSU AIAA Design Build Fly

Fall 2026 - Present

- Analysis Team member, Manufacturing Team member

The Pride of New Mexico

2023 - 2026

- Marching band member, Media Co-Manager

Projects

Remotely Operated Underwater Vehicle (ROV)

- Independently leading a team of student engineers through the design, fabrication, and testing of an ROV
- Integrating mechanical, electrical, and control systems
- On track to deliver a fully functional ROV with live video capabilities by October 2026

Prandtl Bell-Shaped Lift Distribution Replication

- Conducted technical research on Prandtl's 1933 work on bell-shaped lift distribution
- Developed a MATLAB script applying aerodynamic concepts and mathematical modeling to replicate Prandtl's original circulation and downwash distributions

Arduino Inventory Tracking Robot

- Designed and fabricated an autonomous Arduino-based mobile robot for warehouse inventory tracking

1/10 Scale Nitro Radio Control Car

- Rebuilt two-speed automatic transmission
- Repaired and replaced several components and systems

Technical Skills

SolidWorks – Certified SolidWorks CAD

Design Associate; proficient in part modeling, assemblies, and technical drawings

3D Printing – Several years of FDM printing and software experience

Microsoft Office – Proficient with various Microsoft applications

MATLAB – Hands-on and coursework experience

Strengths

- Effective at prioritizing multiple tasks
- Experience leading technical projects
- Strong verbal and written communication
- Receptive to feedback and committed to continuous improvement
- Creative and analytical problem solver

Certifications

SolidWorks CAD Design Associate
(Certificate ID: C-B3JMU82WFH)
